Determine information architecture and create sitemaps for websites & mobile apps.

Identify areas for improvement, including content inventories and audits.

Ensure high quality graphic standards and brand consistency.

**Name of Position** | **Application Architect**

Design and validate application architecture design and other technology architecture

Estimate design efforts, define detailed schedules, evaluate technologies, develop prototypes, architect design.

Change application Architecture as per business need and Technology changes.

Understand and apply architect principles, processes, their standards and guidelines.

Understand, document, and monitor application layering dependencies (User-Interface, Deployment, Public Interface, Application Domain, Application Infrastructure, Technical Frameworks, and Platforms) and application component dependencies.

Document and maintain context diagrams, functional architectures, data architecture, and messaging architecture diagrams and descriptions.

Understand and monitor impacts to and dependencies between existing technical and network environments.

Define and direct proof-of-concept tasks for proposed architectural interactions.

Define, plan, propose, and select enabling technologies to support packaged or custom applications.

Prepare approach papers listing technology options, risks, and impacts of various architectural options for application.

Define data dependencies within, between, and among various applications and application components.

Define and direct coordination among database instances between, and across, various applications and application components.

Document and maintain technical architecture, network architecture, application architecture, and technical application architecture diagrams and descriptions, including releases and versions of software.

Ensure that architectural components optimally address business requirements.

Lead / Participate in technical and infrastructure requirements engineering initiatives.

Coordinate with other architects, project managers, and team leads to ensure the development matches the system model.

Define architecture risk mitigation plans.

Monitor emerging technologies and technical releases from product vendors to evaluate applicability toward current efforts.

**Name of Position** | **Enterprise Architect**

Set up technical standards and governance structure for the enterprise.

Assist business strategy and accordingly drive technology strategy from an architecture perspective.

To provide technology architecture expertise and guidance across multiple business divisions & technology domains.

Setting up technical standards, formulation of Enterprise Architecture (EA) Governance Framework.
