Please note that the eligibility criteria specified herein are the basic criteria for applying for the post. Candidates must necessarily produce the relevant documents pertaining to category, nationality, age, educational qualifications, work experience etc. in original along with a photocopy thereof in support of their identity and eligibility as indicated in the online application form at the time of interview and/or any subsequent stage of the recruitment process as required by the Bank. Please note that no change of category will be permitted at any stage after registration of the online application and the result will be processed considering the category which has been indicated in the online application, subject to guidelines of the Government of India in this regard. Merely applying for the said post/ appearing for and being shortlisted in the Online examination and/or in the subsequent GD/interview and/ subsequent processes does not imply that a candidate will necessarily be offered employment in the Bank. No request for considering the candidature under any category other than in which applied will be entertained.

Note:

- All the educational qualifications mentioned should be from a recognized University/ Institute/ Board recognized by Govt. of India/ approved by Govt. Regulatory Bodies. **Proper document from Board/ University / Regulatory Body has to be submitted at the time of application / interview / as and when called for by the Bank.** The date of passing the examination which is reckoned for eligibility will be the date of passing, appearing on the mark-sheet/ provisional certificate, issued by the University/Institute.
In case the result of a particular examination is posted on the website of the University/ Institute and web based certificate is issued then a certificate **in original** issued by the appropriate authority of the University/ Institute indicating the date of passing properly mentioned thereon will be reckoned for verification and for further process.
- Candidates should indicate the percentage obtained in Graduation/Post Graduation calculated to the nearest two decimals in the online application. Where CGPA/ OGPA is awarded, the same should be converted into percentage and indicate the same in online application. If called for interview, the candidate will have to produce a certificate issued by the appropriate authority inter alia stating the norms of the University regarding conversion of grade into percentage and the percentage of marks scored by the candidate in terms of norms.
- Calculation of Percentage:** The percentage of marks, unless mentioned by the University/ Board, shall be arrived at, by dividing the total marks obtained by the candidate in all the subjects in all semester(s)/ year(s) by aggregate maximum marks in all the subjects irrespective of honours/ optional/ additional optional subject, if any, multiplied by 100. This will be applicable for those Universities also where class/ grade is decided on the basis of Honours marks only.

The fraction of percentage so arrived will be ignored i.e. 59.99% will be treated as less than 60% and 54.99% will be treated as less than 55%.

**Name of Position : Officer-Cloud Engineer (JMG/S-I)/
Manager-Cloud Engineer (MMG/S-II)**

Roles & Responsibilities :

- Design, implement and manage secure, scalable, and reliable cloud infrastructure environments.
- Propose and implement cloud infrastructure.
- Transformation to modern technologies and methods used to run micro services application architectures.
- Building, troubleshooting, and optimizing container-based cloud infrastructure.
- Ensure operational readiness for launching secure and scalable workloads into public and hybrid cloud environments.
- Validate existing infrastructure security, performance and availability and make recommendations for improvements and optimization.
- Ensure Backups, resilience, and business continuity.
- Implement infrastructure best practices

Job specific skills :

- Strong experience with large scale migrations to Cloud Providers such as Azure, AWS, Google, IBM.
- Strong experience in Pvt. Cloud such as VmWare, Hyperconverged Infrastructure etc.
- Knowledge of infrastructure solutions, platform migration, system security, and enterprise directories.
- Deep understanding of cloud computing & in one or more of the following domains: Core Platform: Compute (IaaS & PaaS), Storage, and Networking.
- Monitoring, alerting, and logging tools, and build/release processes highly preferred.
- Demonstrated experience with DevOps, including automation/infrastructure as code.
- Strong knowledge in authentication patterns (MFA).
- Experience with Continuous Integration Delivery models.
- Strong knowledge of network topologies and technologies with emphasis on network gateway devices (ingress/egress).

**Name of Position : Officer- AI Engineer (AI/GenAI/NLP/ML) (JMG/S-I)/
 Manager- AI Engineer (AI/GenAI/NLP/ML) (MMG/S-II)**

Roles & Responsibilities :

- Design and develop AI-based banking applications and products
- End to End AI Model development and Deployment
- Collaborate with cross-functional teams to identify business requirements and develop solutions that meet those needs.
- Ensure the quality and accuracy of AI models by testing and validating
- Work on bug fixing and improving application performance
- Ensure the performance, quality, and responsiveness of applications/ models
- Work closely on the deadlines of the project
- Stay updated with the latest advancements in AI/ML technologies and contribute to the development and improvement of AI frameworks and libraries.

Job specific skills :

- Hands-on experience with any of the AI technologies - Machine Learning, Deep learning, Neural Networks Natural Language Processing, NLG and GenAI – LLMs (LLMA 2, LLMA 3, Gemini, OpenAI, Open-Source models, etc.), SLMs
- Proficiency in high-level programming languages like Python, C++, R
- Experience in Conversational AI and dialogue systems
- Preferred knowledge in practical applications of AI /ML, DL across Banking use cases
- Ability to design & develop practical analytical approach keeping the context of data quality & availability, feasibility, scalability, turnaround time aspects
- Strong understanding of explainable and Responsible/ Ethical AI framework
- Strong understating of Models Governance and Life cycle management
- Experience in working with Tensor Flow, Keras, Pytorch

Name of Position : Senior Manager AI Engineer (AI/GenAI/NLP/ML) (MMG/S-III)

Roles & Responsibilities :

- Design and develop AI-based applications and systems that improve performance and efficiency.
- Develop and Maintain AI strategies
- Implement AI solutions that integrate with existing business systems to enhance functionality and user interaction.
- End to End AI Model development
- Develop machine learning models and AI solutions
- Collaborate with cross-functional teams to identify business requirements and develop solutions that meet those needs.
- Ensure the quality and accuracy of AI models by testing and validating
- Work on bug fixing and improving application performance
- Ensure the performance, quality, and responsiveness of applications/ models

**Name of Position : Officer- API Developer (JMG/S-I)/
 Manager- API Developer (MMG/S-II)/
 Senior Manager- API Developer (MMG/S-III)**

Roles & Responsibilities :

- Design, develop, and maintain scalable and secure APIs.
- Integrate APIs with various in-house and third-party systems and applications.
- Implement authentication and authorization mechanisms.
- Migration of Legacy Services to modern API architecture.
- Collaborate with cross-functional teams, including front-end developers and designers, to define and ship new features.
- Optimize API performance and scalability to ensure high availability and responsiveness.
- Participate in code reviews and ensure code quality and adherence to best practices.
- Contribute to the development of unit tests and documentation for APIs.

Job specific skills :

- Bachelor's degree in Computer Science or related field with a minimum of 01 years of relevant experience.
- Strong proficiency in Java/J2EE development with hands-on experience in Spring Boot and microservices architecture.
- Extensive experience in designing and developing RESTful and SOAP web services. Experience in using GraphQL, gRPC and WebSockets. Working knowledge of XML-RPC, JSON-RPC, AMQP, MQTT and SSE.
- Solid understanding of authentication and authorization protocols like OAuth, JWT, SAML, and Kerberos.
- Experience with API management platforms such as Kong or Layer7 is a plus.
- Proficient in using tools like Swagger/OpenAPI for API documentation.
- Familiarity with DevOps tools like Jenkins, GitHub, and CI/CD pipelines.
- Knowledge of database technologies such as MySQL, PostgreSQL, or MongoDB.
- Strong understanding of version control systems and agile development methodologies.
- Knowledge of Containerization and Orchestration Tools.

**Name of Position : Manager- Network Administrator (MMG/S-II)/
 Officer- Network Administrator (JMG/S-I)**

Roles & Responsibilities :

- Maintain network devices and associated hardware, software, services, and settings.
- Recommend, test, and implement system and security upgrades.
- Consistently monitor and troubleshoot network stability and performance.
- Create, adjust, and maintain network user settings and permissions.
- Write technical support documentation for network systems and applications.
- Design and implement network architectures as per bank's operational requirements
- Troubleshoot problems with network devices and perform updates as per security norms.

Job specific skills :

- Strong fundamental and in depth experience with network (Routing/ Switching /Network security) / load balancing services and appliances is required
- Excellent understanding and direct hands on experience with major vendors router and switch configurations like Juniper, Cisco, Arista etc.
- In depth understanding and experience with WAN technologies like MPLS / EVPL, DS1, DS2, OCS, T1/T3, and even POTs and dial up modem services
- Experience designing, deploying and supporting dynamic routing protocols
- Proficient in the following network protocols: TCP/IP, RIP, DNS, BGP, OSPF, SIP, VOIP, SFTP, FTP, TCP/IP, LDAP, DNS, SNMP, SSL and IPSec. Etc.
- Extensive experience with the setup and support of business-to-business VPNs
- Exposure on Wireless technologies, Load balancer technology.
- Preference will be given to candidate having certification in CCNA, CCNP

- Managing wide area networks (WANs), local area networks (LANs), and organization-specific networks.
- Designing and implementing network architecture.
- Monitoring and troubleshooting network performance.
- Managing network security.
- Administering the Window/Unix Servers, workstations and mobile devices, as well as ensuring that the email and data storage networks are working effectively.
- Perform regular maintenance and updates on network hardware and software.
- Regularly review and update firewall rules, and access controls
- Respond to network incidents and outages, coordinating troubleshooting efforts to restore services quickly.
- Maintain accurate documentation of network configurations, changes, and procedures

**Name of Position : Manager- Server Administrator (Linux & Unix) (MMG/S-II)/
Officer- Server Administrator (Linux & Unix) (JMG/S-I)**

Roles & Responsibilities :

- Perform server administration tasks (ex: user/group, security permissions, group policies, print services); research event-log warnings and errors; and monitor resources to ensure that systems architecture components work together seamlessly
- Monitor data-center health using existing management tools and respond to hardware issues as they arise; help build, test, and maintain new servers when needed.
- Maintain internal infrastructure requirements, including laptop and desktop computers, servers, routers, switches, firewalls, printers, phones, security updates, support internet, intranet, LANs, WANs, and network segments
- Assist the help desk and other teams with troubleshooting to identify root cause, and provide technical support when needed
- Perform routine and scheduled audits of all systems, including backups.

Job specific skills :

- Install and configure server hardware and operating systems (e.g., Windows Server, Linux, AIX).
- Maintaining, configuring, and installing server software and hardware.
- Monitoring server performance and health using various tools.
- Developing and refining the processes for ongoing management of servers.
- Designing and implementing new server solutions.To build solutions, implement new software and hardware, provide training, and assist in developing the overall IT strategy.
- Maintain DNS and DHCP services, group policies, and network policy services.
- Setup and configure new MS Windows servers as required in VMWare clustered environment
- Coordinate use of technology resources with user's needs.
- Install software releases.
- Leads upgrades of database software and hardware, provides ongoing support, as required, of same.
- Manage the daily operations of the corporate Windows & Solaris servers, Windows PCs and network.
- Upgrading server OSes and various applications
- Auditing system logs for troubleshooting and incident response.
- Collaborate on projects and provide technical support as needed

**Name of Position : Senior Manager Database Administrator(SQL) (MMG/S-III)/
Senior Manager Database Administrator(Oracle) (MMG/S-III)**

Roles & Responsibilities :

- To Develop and maintain database documentation, including data standards, procedures and definitions for data elements and tables in the company.
- To Identify and implement database requirements for new or existing applications by working collaboratively with other teams.
- To Optimise database performance and efficiency by evaluating and recommending new database technologies.
- To Support users and developers by resolving data-related technical issues and troubleshooting queries by guiding them with best practices.
- To Execute regular database maintenance tasks, including database defragmentation, backups, and database replication.
- To analyse database growth and plan for future capacity needs, ensuring that resources are allocated efficiently.
- Maintain comprehensive documentation of database configurations, procedures, and policies for audit and training purposes.
- Regularly update and patch database management systems to ensure security and stability.

- To execute Database upgrade and integration of database monitoring and performance metrics in tools
- To monitor and design data replication rools for downstream systems.
- To implement automation for repeated jobs in database.

Job specific skills :

- Design, install, configure and maintain database systems, including monitoring, tuning and troubleshooting issues.
- Execute disaster recovery plans and procedures to ensure database availability during system outages or dysfunction.
- Able to leads and mentors junior DBAs, coordinates with other IT teams, and communicates with stakeholders and clients.
- To create and modifying database schemas, tables, views, indexes, triggers, stored procedures, functions, and other objects.
- Designs and implements data models, data dictionaries, data standards, and data quality rules.
- Should have knowledge and expertise in uses of at least one tools and languages, such as SQL, PL/SQL, Oracle, MySQL, PostgreSQL, MongoDB, and NoSQL, to develop and manage databases.
- To implements and enforces database security policies, roles, permissions, encryption, auditing, and logging and performs regular backups and restores of the databases.
- Manage and monitor disk space, database space, CPU, memory and cache, user connections. Work with complex ETL architecture that is fully dynamic to integrate all clients.
- Expertise in database performance tuning and optimization techniques.
- Knowledge of high availability structures and configration, backup strategies, disaster recovery plans, and tools (e.g RMAN for oracle, RAC for oracle)
- Understanding of database security protocols, including encryption, access controls, and access compliance regulations (e.g.,GDPR, PCI DSS)
- Familiarity with cloud based database solutions (e.g., AWS RDS, Azure SQL DB) for modern database.
- Strong analytical skills for diagnosing and resolving database issues promptly.

**Name of Position : Senior Manager-Data Scientist (MMG/S-III)/
 Manager- Data Scientist (MMG/S-II)/
 Officer- Data Scientist (JMG/S-I)**

Roles & Responsibilities :

- Work in Bank's Analytics Centre of Excellence as data Scientist
- Identify, analyze, and interpret trends or patterns in complex data sets
- Utilize a hypothesis-driven problem-solving approach to design, construct, and rapidly test/iterate exploratory analytics that will reveal insight and opportunities for the business
- Generate efficient data marts, analysis and reports on large data sets, building basic automations to reduce manual interventions for repeated analysis and data updates
- Work with management to prioritize business and information needs
- Locate and define new process improvement opportunities
- Implement and Deploy Machine Learning/ Artificial Intelligence/ Natural Language Processing models using R/Python etc.
- Monitor the performance and accuracy of the AI/ML models in production.
- Design and implement Big data scalable workflow systems using Big Data Technologies
- Closely collaborate with business teams to develop/ co-create analytics use case
- Understand business requirements, devise and implement strategies to improve the operational efficiencies/business KPIs using AI/ML techniques

Job specific skills :

- Proven working experience as data scientist
- Technical expertise regarding data models, database design development, data mining and segmentation techniques
- Hands on data analysis experience using Relational Databases and Big Data platforms. Ability to query in SQL, Spark etc.
- Knowledge of statistics and experience using statistical packages for analyzing datasets.
- Strong analytical skills with the ability to collect, organize, analyze, and disseminate significant amounts of information with attention to detail and accuracy
- Strong in Advanced Machine learning/ Artificial Intelligence, Natural Language Processing, Neural Networks, Deep Learning techniques.
- Experience with programming languages/tools used in data science (R/Python etc.)
- Knowledge of Cloudera Data Science Workbench is a plus.
- Familiarity with developing models using semi structure as well as unstructured data.
- End to end experience in development from data extraction, data quality assessment to modelling and validation.
- Self-driven individual with business acumen
- Strong understanding of Banking Business Domains.

**Name of Position : Senior Manager - Data Engineer (MMG/S-III)/
 Manager - Data Engineer (MMG/S-II)/
 Officer Data Engineer (JMG/S-I)**

Roles & Responsibilities :

- Data engineers are required to work closely with Data Scientist and Analytics professionals, designers, project managers, QA engineers, operations engineers, third party systems providers and other stakeholders in the Data ecosystem of the organization.
- Required to manage Cloudera Big Data Environment (CDH)
- Data engineers are also required to determine what data management systems are appropriate and which data are needed for analysis.
- Create and maintain optimal data pipeline architecture.
- Identify, design, and implement internal process improvements: automating manual processes, optimizing data delivery, re-designing infrastructure for greater scalability, etc.
- Build the infrastructure required for optimal extraction, transformation, and loading of data from a wide variety of data sources using RDBMS and 'big data' technologies
- Work with data and analytics teams to strive for functionality enhancement in data systems.

Job specific skills :

- Should have proficient understanding of databases such as Relational (SQL), distributed (NoSQL), etc.
- Experience with installation on multi cluster Hadoop environment. Experience in large clusters is preferred.
- Experience with Maintenance of the applications and infrastructure.
- Knowledge of Informatica Big data management
- Experience with Hadoop Administration
- Experience with development of common ingestion framework, hive structure creation, compression, encryption steps
- Experience with unix shell scripting, Perl
- Experience with tools like Nifi, HBase, Spark, pig, storm, flume
- Experience with Hive which includes creation of schema structures, partitioning & performance tuning
- ASM & RAC Experience

Before applying online, a candidate will be required to have a scanned (digital) image of his/ her photograph and signature as per the specifications given below:-

(i) Photograph Image :-

- Photograph must be a recent passport style colour picture.
- Make sure that the picture is in colour, taken against a light coloured, preferably white background.
- Look straight at the camera with a relaxed face.
- If the picture is taken on a sunny day, have the sun behind you, or place yourself in the shade, so that you are not squinting and there are no harsh shadows.
- If you have to use flash, ensure there's no "red-eye".
- If you wear glasses make sure that there are no reflections and your eyes can be clearly seen.
- Caps, hats and dark glasses are not acceptable, religious headwear is allowed but it must not cover your face.
- Dimensions 200 x 230 pixels (preferred)
- Size of the file should be between 20kb – 50kb.
- Ensure that the size of the scanned image is not more than 50kb. If the size of the file is more than 50kb, then adjust the settings of the scanner such as the DPI resolution, no of colours etc during the process of scanning.

(ii) Signature Imaging :-

- The applicant has to sign on white paper with Black Ink Pen.
- The signature must be signed only by the applicant and not by any other person.
- The signature will be used to put on the Call letter and wherever necessary.
- If the applicant's signature on the answer script at the time of the examination does not match the signature on the Call letter, the applicant will be disqualified.
- Dimensions 140 x 60 pixels (preferred)
- Size of the file should be between 10kb – 20kb.
- Ensure that the size of the scanned image is not more than 20kb.
- **Signature in CAPITAL LETTERS shall NOT be accepted**

(iii) Guidelines for scanning of photograph, signature & documents :-

1. Set the scanner resolution to a minimum of 200 dpi (dots per inch).
2. Set the colour to True Colour
3. Crop the image in the scanner to the edge of the photograph/ signature, then use the upload editor to crop the image to the final size (as specified above).
4. The image file should be JPG or JPEG format. An example file name is: image01.jpg or image01.jpeg. Image dimensions can be checked by listing the folder files or moving the mouse over the file image icon.
5. Image dimensions can be checked by listing the folder/ files or moving the mouse over the file image icon.
6. Candidates using MSWindows/ MSOffice can easily obtain photo and signature in .jpeg format not exceeding 50kb and 20kb respectively by using MSPaint or MSOffice Picture Manager. Scanned photograph and signature in any format can be saved in .jpg format by using 'Save As' option in the File menu and size can be reduced below 50kb (photograph) & 20kb (signature) by using crop and then resize option (Please see point (i) & (ii) above for the pixel size) in the 'Image' menu. Similar options are available in other photo editor also.
7. If the file size and format are not as prescribed, an error message will be displayed.
8. While filling in the Online Application Form, the candidate will be provided with a link to upload his photograph and signature.

PROCEDURE FOR UPLOADING THE PHOTOGRAPH, SIGNATURE & DOCUMENTS :-

- (i) There will be separate links for uploading Photograph, Signature & Documents.
- (ii) Click on the respective link 'Upload'.
- (iii) Browse and select the location where the scanned photograph, signature or document files has been saved.
- (iv) Select the file by clicking on it & click the 'Upload' button.
- (v) Click Preview to confirm the document is uploaded and accessible properly before submitting the application. If the file size and format are not as prescribed, an error message will be displayed.
- (vi) Once uploaded/ submitted, the Documents uploaded cannot be edited/ changed.

(vii) After uploading the photograph/ signature in the online application form candidates should check that the images are clear and have been uploaded correctly. In case the photograph or signature is not prominently visible, the candidate may edit his/ her application and re-upload his/ her photograph or signature, prior to submitting the form. If the face in the photograph or signature is unclear the candidate's application may be rejected.

Your Online Application will not be registered unless you upload your photograph, signature & documents as specified.

Note :-
